

Airport Enhancement Services Version 2.07

What is new in this Version 2.07:

This version includes 20 new Airports, most of them usable in both FS Versions. Some of this Airportaddons are not released now, will be available the next week, so you can use them with AES direct after.

LOWW Version 2.0 of Flytampa is also included, but was already available as a update for AES 2.06 in the Aerosoft forum.

Beside the support auf Aerosoft EHAM in FSX, new AES adds the Gates in the Area B, which was added with the EHAM Update for FS9. Also all Pushback procedures now fit to the real live operations (as far as possible).

The internal functions of AES don't change, but this is now at the top of the agenda for the next Version.

New: AESRemote

There is now a new small Tool available, called AESRemote, which you can find in the <FS>\Aerosoft\AES\AESRemote Subfolder. There you can find a small Doc file, which must be read before use.

AESRemote allows the remote control of the AES Window from a second PC, which is connected to the FS PC via a network. So this could be helpful for all homecockpit users.

More in the AESRemote_ENG.PDF documentation file.

Have fun,

Oliver Pabst
